A Webinar on : “Forensic Investigation from Engineering, Perspective”

by Ts Alex Tan,
Senior Consultant

The MITBA logo consists of the letters "MITBA" in a bold, white, sans-serif font, centered within a dark red oval. This oval is set against a white background that is framed by a thick red border, which is itself set within a larger white hexagonal shape with a red outline.

Ts Alex Tan, Senior Consultant

Has been conducting forensic investigation for more than 13 years. Conducted various types of investigations such as fire, explosion, vehicle identification, vehicle accident and accident reconstruction, lightning damage, water damage, lift failures, machinery failures, mechanical failures, electrical and electronic failures, chemical identification, glass examination, and other forensic related cases. He has handled numerous large losses in Malaysia, Indonesia, Singapore, Thailand, Philippines, Vietnam, China, South Korea, Brunei, Cambodia, Pakistan, Sri Lanka and India. Certified fire and explosion investigator (NAFI-CFEI), Professional Technologist from MBOT and members of national and international bodies, which include IFE, FSSM, NAFI, IAAI, IAFI, NAPARS, BEM, MBOT, ASM, IMMM. Invited speakers and conducted CPD training for various associations, insurance and adjusting companies

Forsci Consultancy Sdn Bhd paved its way into the industry in 2019. Despite being a new company, the combined experience of the consultants in Forensic Investigation adds up to more than 30 years. Our consultants are available to undertake site visits, provide reliable and well-researched reports and serve as experts in forensic investigation. Our strength is developed by our unique ideas, modern approach, and values. We always strive to provide excellent and efficient services by giving equal importance to all who are involved in the industry: our diverse and talented team, partners and clients. We pride ourselves on our capacity to adapt to dynamic innovations, while also ensuring that the needs of our valuable clients are at the forefront of ForSci's core interest.
